Kaylen van der Berg

Foreword

Procurement is the **process of buying goods or services**. Procurement is often carried out by the process of tendering (inviting many suppliers to respond to a formal request for goods or services), **rather** than buying products directly from a seller. It includes invitations to possible suppliers, then through a process of qualification, assessment and evaluation, getting to a preferred supplier.

Properly done, tender management will start with a “**procurement trigger**” (Purchase request or procurement plan) and include components of **meeting** management, **committee** appointments, **declarations of interest** and **specification** management.

Tender management is also used by **project management** organizations to analyze data of proposed & current projects. Project portfolio managers provide forecasting & business analysis when looking to invest in new projects. It starts with obtaining approval and extends into the procurement cycle. By seeing the big picture of how a proposed project will fit into the goals and objectives of the organization, companies can make **better decisions** on what projects to choose and what initiatives will create the most return.

The **objective** is a formal, cost effective process, removing subjectivity and increasing governance & transparency.

It involves **filtering** through (like a **funnel** which starts off with many and end with few) all suppliers that responded to the invitation through steps of **Qualification** of supplier as an organization; doing **technical analysis** on the content of the supplier response, final **evaluation** looking at pricing and possible costs, ending in a **recommended shortlist**.

Finally, Tender management concludes with **contracts**. Contracting officers should have a **common thread** through the tenders – back to the initial **procurement trigger**.

They should also set up and maintain complete and up to date records on every aspect of the contract, both to provide a list of actions taken, and to protect the organization's interests under the contract. This will give an **organizational memory** of activities and events.

1. Technology

- Microsoft Dynamics 365 (D365 for Finance and Operations)
 - HSE & GRC modules
- Axnosys middleware
- Ionic/Angular standalone applications
 - Safety permit mobile app

2. Demo setup

- This script is written for use with D365 for Finance and Operations and Axnosis Permits to work mobile app.
- The apps support both platforms

- The apps can be downloaded from:
 - Android: Google Play store
 - iOS: AppStore or TestFlight
- The user must be registered in AAD and should be a registered user in D365 for Finance and Operations:
 - Environment: Same D365 environment as used for transacting
 - Company: Defaults to the user setup in D365
- The users should be able to successfully login to the app by using the same login details as used for D365 for Finance and Operations. The relevant security role restrictions and legal entity allocations on D365 for Finance and Operations should be considered and applied on the mobile app sessions. The same user security roles will permit/exclude the user's right to capture events on the app.
- Whenever a new app update is required to be installed on the mobile phone, first ensure:
 - Current (old) app is uninstalled
 - Clear the mobile phone's cache (Android)
 - Remove all previous downloads of the application from the phone's download folder
 - Re-install the application and use

2.1 Background and Scenario

Separate committees are created in D365 to segregate the different roles and duties in the tender process. There are normally two explicit evaluations performed on the vendor responses to tender invitations. Technical and commercial checklists are assigned to the members of the said committees. The members of these committees are often away from their PCs and late submission of their checklist scores is not allowed. The BEC mobile app makes it possible for these members to do scoring on checklists assigned to them from their mobile devices.

The BEC mobile app also shows the procurement bid meetings where the logged in user is the owner of the meeting, thus the user has a view of future tender meetings that he/she needs to prepare for and attend. Another great feature is that the mobile app allows the committee members to do a declaration of interest without opening their PC.

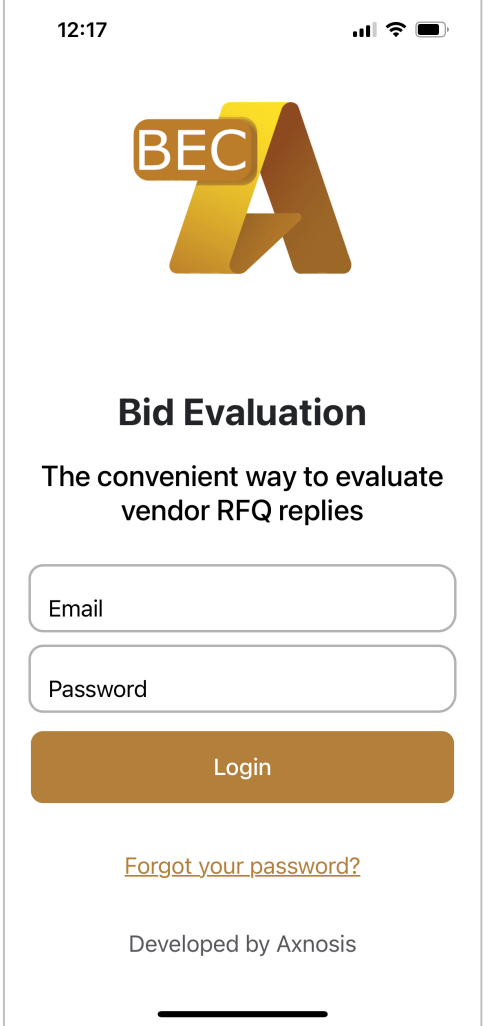

All of the above provides a compelling reason to do certain bid functions on a mobile app.

- It is assumed that the D365 GRC module is installed on D365
- Procurement plans and RFQs are created in D365
- Technical and Commercial checklists are created in D365

3. Demo script

3.1 Log into the BEC app

TALKING POINTS AND STEPS	MOBILE APP
<p>The user takes out his/her mobile phone and taps on the BEC icon.</p>	

TALKING POINTS AND STEPS	MOBILE APP
<p>The logo on the login screen appears ...</p> <p>The user's D365 login details (Username and Password) are entered and used by the app for validation.</p> <p>The user then taps on the Login button to log into the app session.</p>	

If multi-factor authentication has been enabled for the organization, Microsoft sign in may require in addition to the application sign in. During the initial sign in, the Microsoft sign in may have to be completed twice.

The Microsoft sign in will not be required during every sign in to the mobile application. Sign in to Microsoft will be required during initial sign in; after sign in expiry and after a user has opted to manually sign out of the Laboratory application.

Enter the **Microsoft email account** and click on the **Next** button to continue.

Sign in

[Forgot my password](#)

Sign in

[Terms of use](#) [Privacy & cookies](#) ...

If multi-factor authentication is enabled, the **authentication number** may be displayed.

Take note of the number for entry in the authenticator app.

julene.vaneeden@axnosis.com

Approve sign in request

Open your Authenticator app, and enter the number shown to sign in.

88

No numbers in your app? Make sure to upgrade to the latest version.

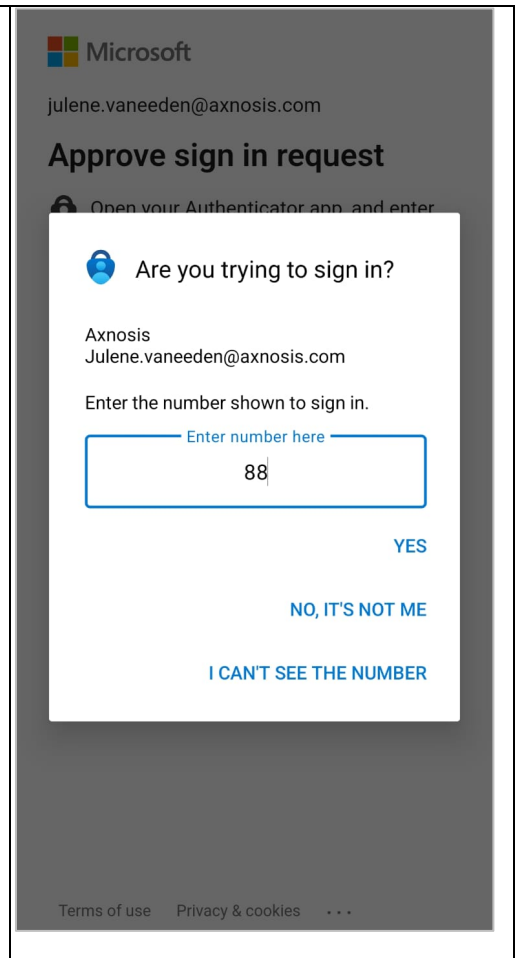

[I can't use my Microsoft Authenticator app right now](#)

[More information](#)

[Terms of use](#) [Privacy & cookies](#) ...

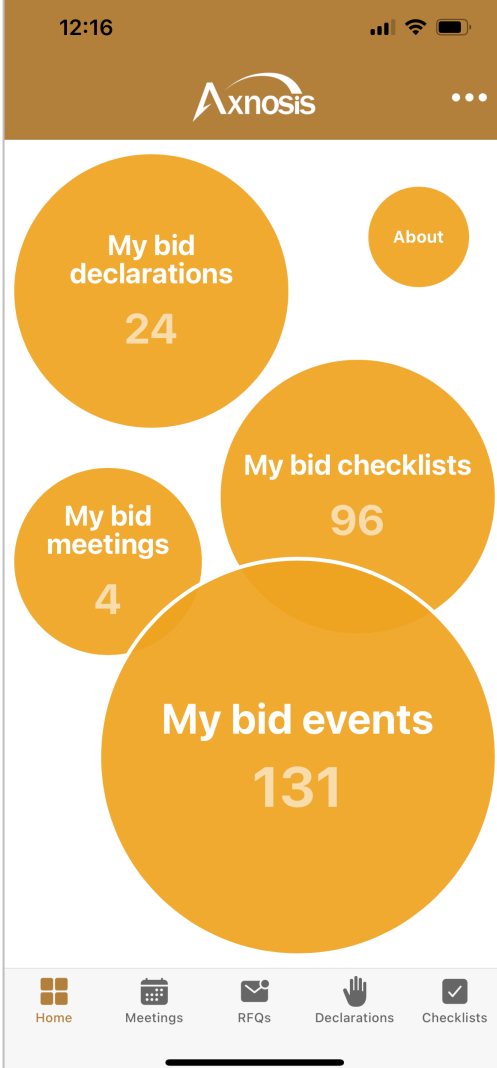

A notification may appear requiring the authentication number to be entered or the user may opt to access the authenticator app manually to complete the authentication process.

Enter the **authentication number** previously provided to approve the sign in then click on the **Yes** button to continue.

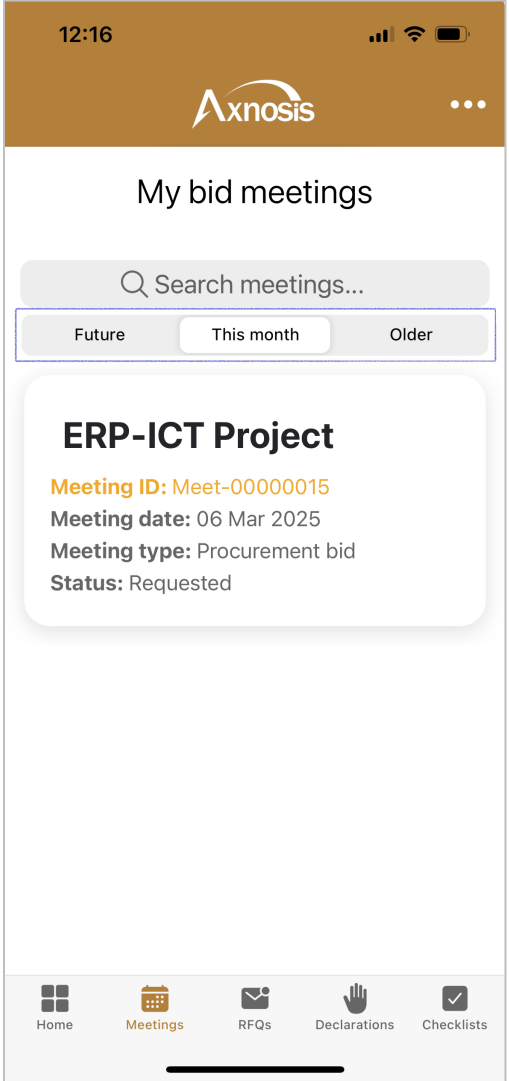

The screenshot shows a Microsoft Dynamics 365 FO mobile app interface. At the top, the Microsoft logo is visible, followed by the email address 'julene.vaneeden@axnosis.com'. Below this, the text 'Approve sign in request' is displayed. A notification icon and the text 'Open your Authenticator app, and enter' are shown. A white modal box is centered on the screen with the heading 'Are you trying to sign in?'. Inside the modal, the text 'Axnosis Julene.vaneeden@axnosis.com' is displayed, followed by the instruction 'Enter the number shown to sign in.' Below this is a text input field with the placeholder 'Enter number here' and the value '88'. At the bottom of the modal, there are three buttons: 'YES', 'NO, IT'S NOT ME', and 'I CAN'T SEE THE NUMBER'. At the very bottom of the screen, there are links for 'Terms of use', 'Privacy & cookies', and a three-dot menu icon.

3.2 Home screen

TALKING POINTS AND STEPS	MOBILE APP
<p>The Home screen opens. The five tabs on this screen gives the user the option to view:</p> <ul style="list-style-type: none"> • My bid meetings <ul style="list-style-type: none"> ○ Where meeting type = procurement bid ○ Where the logged in user = meeting owner • My bid declarations <ul style="list-style-type: none"> ○ Done by logged in user ○ Declarations linked to RFQs • My bid checklists <ul style="list-style-type: none"> ○ Technical checklists assigned to logged in user ○ Commercial checklists assigned to logged in user • My bid events <ul style="list-style-type: none"> ○ All RFQs where logged in user is in the technical evaluation committee/commercial evaluation committee • About <p>Click on the My bid meetings bubble.</p>	

3.3 My bid meetings

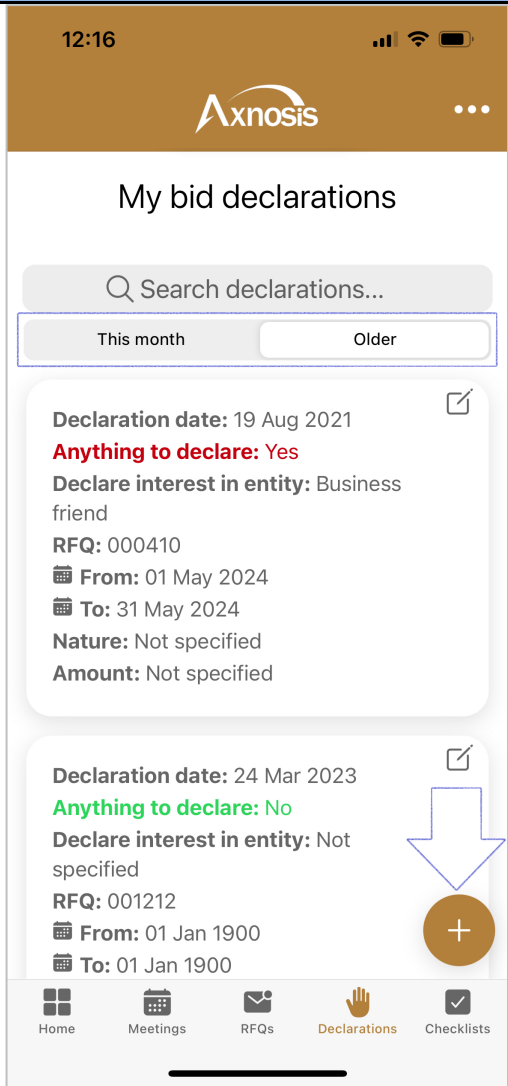

TALKING POINTS AND STEPS	MOBILE APP
<p>The My bid meetings screen opens and the user can see the following:</p> <ul style="list-style-type: none"> • Future bid meetings • Bid meetings scheduled for this month • Older bid meetings <p>Click on the Home page button and go to My bid declarations.</p>	

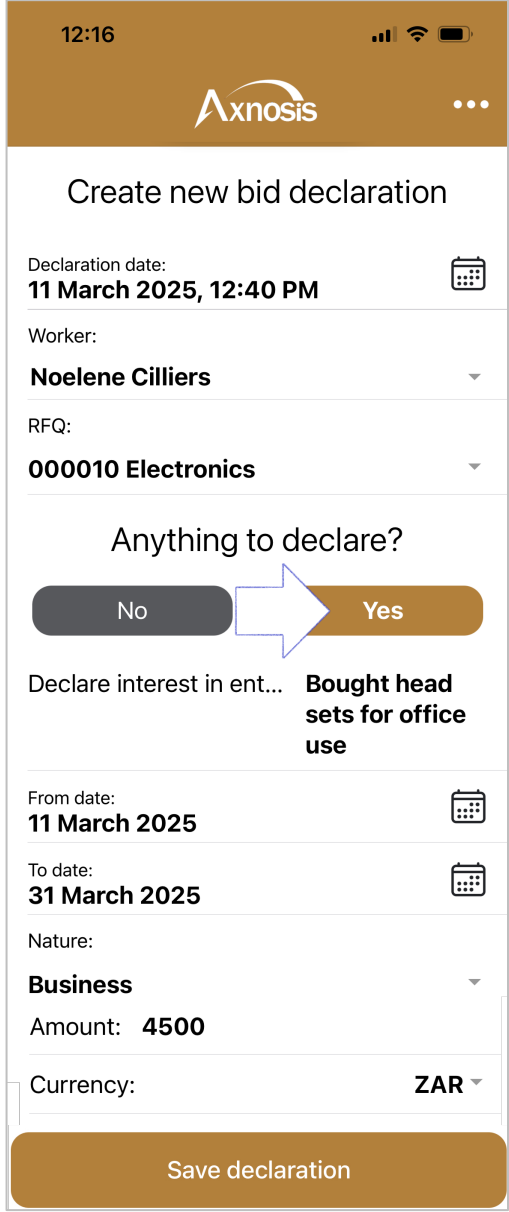

3.3.1 Procurement bid meetings

3.4 My bid declarations

TALKING POINTS AND STEPS	MOBILE APP
<p>Tap on the My bid declarations bubble.</p> <p>Declarations done that were done by the user can be viewed on this screen.</p> <ul style="list-style-type: none"> • Declarations done in This month (current month) • or Older declarations <p>Tap on the + button at the bottom of the screen to do a declaration.</p>	 <p>The screenshot shows the 'My bid declarations' screen in the Axnosis mobile app. At the top, there's a search bar and two tabs: 'This month' (selected) and 'Older'. Below the tabs, there are two declaration cards. The first card is for a declaration dated 19 Aug 2021, with 'Anything to declare: Yes' in red, and the second card is for a declaration dated 24 Mar 2023, with 'Anything to declare: No' in green. Both cards show 'Declare interest in entity' status, RFQ numbers, and date ranges. At the bottom right, a blue arrow points to a circular '+' button, which is used to add a new declaration. The bottom navigation bar includes icons for Home, Meetings, RFQs, Declarations (highlighted), and Checklists.</p>

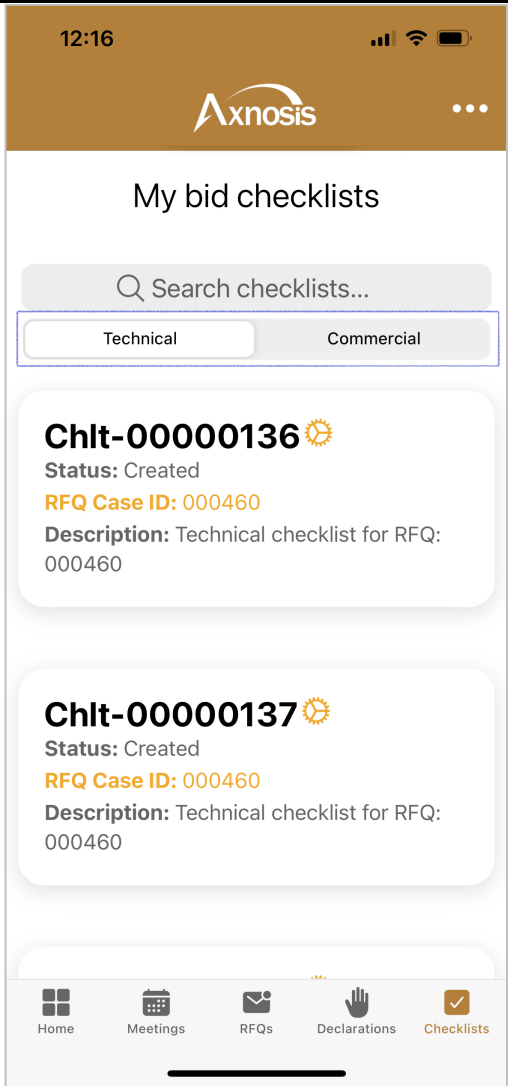

TALKING POINTS AND STEPS	MOBILE APP
<p>Fill in the following information:</p> <ul style="list-style-type: none"> • Declaration date • Worker <ul style="list-style-type: none"> ○ Defaults to logged in worker but can be changed • Select the RFQ that the declaration is being done for • Anything to declare: Select No/Yes • If Yes: <ul style="list-style-type: none"> ○ Enter from/to date ○ Nature ○ Amount ○ Currency <p>Click on the Save declaration button.</p> <p>You have now created a new bid declaration.</p>	

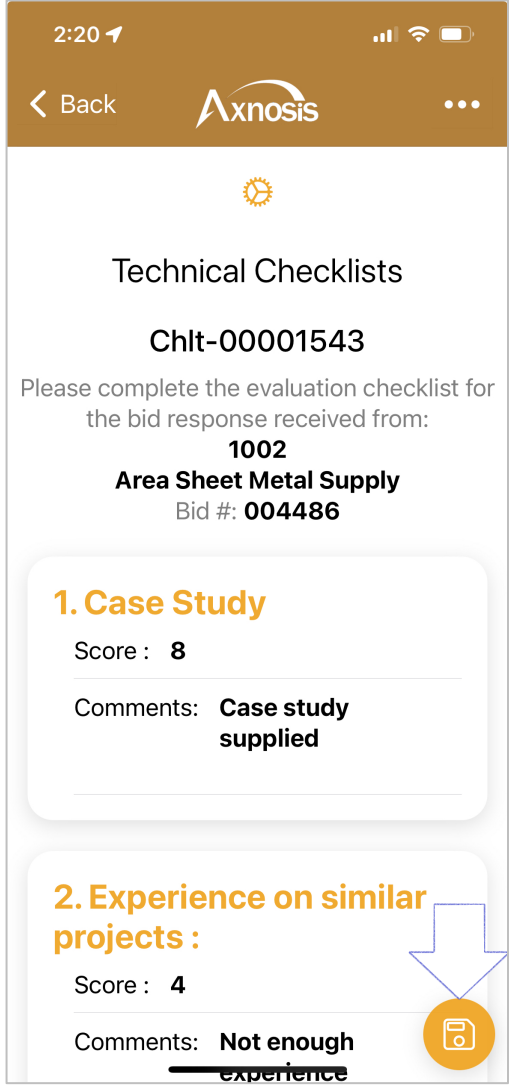

3.4.1 Declaration of interest register
